We proudly serve a large array of local artisan products. Organic is important to us, but more importantly, we believe in all natural products without the use of steroids or growth hormones, and responsibly raised animals. We embrace the idea of localism to strengthen our community as well as our preference for products and practices that are sustainable. Consuming raw or undercooked meats, seafood, poultry or eggs increases the likelihood for foodborne illness, especially if you are pregnant or have certain medical conditions.
